

SAI.ngo — Links + Dated Content Audit (v2)

Location-enriched. Original crawl 2026-05-12; location detail added via Chrome MCP DOM re-inspection 2026-06-06. 17 pages, 123 unique internal URLs, 5 social profiles, 82 unique injected-spam domains.

What changed in v2. Every finding now carries a "Location on page" column describing where to find the problem in the live DOM — nearest heading, section class, approximate document Y position, and whether the element is actually visible or just markup. Several "dead link" findings turn out to be *both* dead AND hidden (display:none) — meaning the user sees no button at all rather than a button that fails on click. Those are called out individually.

Headline issues, in priority order. (1) **Site appears SEO-compromised.** 1,225 outbound gambling / slot / toto / pulsa spam links are injected across 17 pages — wrapped in <p><a> tags inside a top-level <div> with computed display:none. Invisible to humans, fully indexed by Google. Treat as a security incident: malware scan (Wordfence / Sucuri), audit WP admin users, audit recently-installed plugins, remove the injected DIV. (2) **Every primary donate CTA on a project page is dead.** The full-width navy banner "DONATE TO THIS PROJECT" immediately below the project hero (with the Platinum / Top rated trust badges) is href="javascript:void(0)" with no handler. The Crypto and DAF primary CTAs are href="#" and additionally hidden (display:none) — no working donate button exists on those landing pages at all. (3) **Social media — two of five broken.** Twitter and YouTube URLs have no handle / channel; WhatsApp number has an invalid leading-zero format. (4) **Dated content.** Homepage news rotation still surfaces 2024 and 2019 articles. 10 of 17 pages carry pre-2026 year tags in visible body copy.

Pages crawled (17)

/, /about-us, /projects, /news, /contact, /donation, /how-to-donate-cryptocurrency-to-help-venezuela, /how-employees-of-fortune-500-companies-can-help-venezuela, /donor-advised-funds-donations-daf-venezuelan, /project/children-medical-clinic-venezuela, /project/help-venezuela, /project/orphans-venezuela, /project/help-venezuelan-hospitals-supplying-food-and-medicine, /project/pets-venezuela, /project/venezuelan-refugee-fund, /project/endangered-animal-rescue-fund-venezuela-zoo, /project/south-american-initiative-vns.

Part A — Broken / suspect links (with location)

Page	Link / URL	Status	Location on page	Notes / severity
All 17 pages	82 unique gambling/slot/toto/pulsa' spam domains injected as anchor text	200 (live) [HIGH]	Hidden injection — links sit inside a top-level <div> under <body> with computed style display:none, wrapping <p><a>...</p> blocks. Invisible to humans, fully crawlable by Google. Classic SEO cloaking / malware injection pattern — present on every page sampled (53 on / alone).	Site appears SEO-compromised. 1,225 outbound spam links across 17 pages. Run a malware scan (Wordfence / Sucuri), audit WP admins + recently-installed plugins, and remove the injected DIV.
All 8 Project pages (/project/*)	"DONATE TO THIS PROJECT" — javascript:void(0)	DEAD [HIGH]	Full-width navy banner immediately below the project hero photo and above the H2 (e.g. on /project/orphans-venezuela: a 903x586px band at y=586, carrying the trust badges "Platinum / Top rated / Vetted / Top ranked";, sits right before H2 "The food crisis in Venezuela affects all sectors of society"). This IS the prominent primary CTA users see.	href="javascript:void(0)" with no JS handler — the most-clicked donate button on every project page does nothing. (A second "DONATE TO THIS PROJECT" further down the page does link to /donation.)
All 8 Project pages (/project/*)	"Visit Website" — href="#"	DEAD [HIGH]	Markup is present but the anchor is rendered with width=0, height=0 — not visible to end users. It would presumably become visible for project records that have an external website URL configured.	Even though hidden today, every project page ships this dead anchor. Either populate or remove the markup so it does not surface for any future project.
Home (/)	"DONATE" — href="" (appears 2x)	DEAD [HIGH]	Inside <section class="py-6 lg:py-16"> — the centred call-to-action band on the homepage. Both instances of the navy DONATE pill button are dead anchors.	Top-of-page primary donate buttons do not link anywhere. Point both at /donation.
Home (/)	"DISCOVER MORE" — href=""	DEAD [HIGH]	Inside <section class="pb-4 bg-[#f4f4f4]"> — the light-grey panel directly under the hero with the "Our Projects" intro tiles.	Hero-area CTA is a dead anchor.

Page	Link / URL	Status	Location on page	Notes / severity
Home (/)	"CONTACT US "; — href=""; (appears 2x)	DEAD [HIGH]	In two side-by-side <article> cards near the lower-middle of the homepage: one under H3 "START VOLUNTEERING";, one under H3 "BECOME A SPONSOR";.	Both engagement CTAs are dead anchors. Point at /contact.
Home (/)	"Follow us on our social media"; — href="#"; (2x)	DEAD [MED]	Inside <section class="pt-10 lg:pt-10">;, the social-icons bar above the main footer. The block's heading link itself is a dead anchor (the individual icons below it work).	Heading anchor goes nowhere — either link it to a social hub page or strip the <a>.
About Us (/about-us)	"DONATE TO FEEDING DREAM"; — href="";	DEAD [HIGH]	Visible 283×~48px orange button at y=1481, inside the program block whose H2 reads "Malnutrition #1 Cause of Illness & Death for Infants, Hospital Patients, Abandoned...";	Program-specific donate button is dead.
About Us (/about-us)	"DONATE TO DOG SANCTUARY "; — href="";	DEAD [HIGH]	Visible 282px-wide button at y=2058, inside the first "Helping People & Animals in Their Deepest Time of Need"; H2 block.	Program-specific donate button is dead.
About Us (/about-us)	"DONATE TO ORPHANS PROGRAM"; — href="";	DEAD [HIGH]	Visible 312px-wide button at y=2625, inside the second "Helping People & Animals in Their Deepest Time of Need"; H2 block.	Program-specific donate button is dead.
About Us (/about-us)	"CONTACT US "; — href=""; (3x)	DEAD [HIGH]	Two are in the side-by-side "START VOLUNTEERING"; / "BECOME A SPONSOR"; cards at y=5193 above the footer; the third is the main-body Contact CTA earlier on the page.	All three Contact-Us anchors on About are dead.
About Us (/about-us)	"Follow us on our social media"; — href="#"; (2x)	DEAD [MED]	Social-icons block above the global footer.	Heading anchor goes nowhere.
Crypto (/how-to-donate-cryptocurrency-to-help-venezuela)	"DONATE CRYPTO"; — href="#";	DEAD [HIGH]	Inside <div class="px-8 py-8">; under H1 "HOW TO DONATE / CRYPTOCURRENC"; — but the <a> has computed style display:none. Markup is dead AND invisible — page has NO visible primary CTA at all.	Crypto landing page ships no working donate CTA. Fix the markup (href) AND restore visibility — currently visitors cannot click anywhere to donate crypto.
Crypto (/how-to-donate-cryptocurrency-to-help-venezuela)	"Follow us on our social media"; — href="#"; (2x)	DEAD [MED]	Social-icons heading near the bottom of the page (y=1926). Markup duplicated in a hidden header block as well.	Heading anchor goes nowhere.
DAF (/donor-advised-funds-donations-daf-venezuela)	"Donate through DAF"; — href="#";	DEAD [HIGH]	Under H1 "DONOR ADVISED FUNDS"; — the <a> has computed style display:none. Page's stated primary CTA is both dead AND invisible.	Fix the href AND restore visibility — visitors currently cannot click a donate-via-DAF button anywhere on this page.
DAF (/donor-advised-funds-donations-daf-venezuela)	"What is this?"; — href="#";	DEAD [MED]	Inline link at y=1237, just under H2 "YOUR GIFT WILL HELP THE SOUTH AMERICAN INITIATIVE.";. Looks like a help/tooltip trigger but goes nowhere.	Either wire to a DAF explainer or remove.
DAF (/donor-advised-funds-donations-daf-venezuela)	"Close"; (modal) — href="#";	DEAD [LOW]	Inside the "What is this?"; modal markup (currently hidden).	Modal close handled by JS — informational.
DAF (/donor-advised-funds-donations-daf-venezuela)	"Follow us on our social media"; — href="#"; (2x)	DEAD [MED]	Social-icons heading at y=1824 above the footer.	Heading anchor goes nowhere.
Donate (/donation)	"Donate to this project"; — javascript:void(0)	DEAD [HIGH]	Project-CTA banner template below H1 "SAI PROVIDES FOOD AND MEDICAL CARE";. Computed display:none on this page — markup is inherited from the project-page template but hidden.	Dead markup carried over from project template; safe to remove on /donation specifically.

Page	Link / URL	Status	Location on page	Notes / severity
Donate (/donation)	"Visit Website >" — href="#";	DEAD [MED]	Same hidden "certModaLink" anchor as on project pages.	Dead inherited markup.
Donate (/donation)	"Follow us on our social media" — href="#"; (2x)	DEAD [MED]	Social-icons heading near footer (y≈2924).	Heading anchor goes nowhere.
Employer Matching (/how-employees-of-fortune-500-...)	"Follow us on our social media" — href="#"; (2x)	DEAD [MED]	Social-icons heading above the footer.	Heading anchor goes nowhere.
All pages	All 123 unique internal sai.ngo URLs	200 OK [INFO]	Header nav, footer nav, sidebar links, in-body links — full sweep.	No internal 4XX/5XX. Internal linking is intact at the protocol level.
Site-wide	mailto:Donate@Sai.ngo vs mailto:donate@sai.ngo	mailto [INFO]	Header / contact areas — both casings appear in different templates.	Casing drift only; mail still delivers.

Part B — Dated / outdated content (with location)

Page	Section	Finding	Year(s)	Location on page	Sev
Home (/)	News carousel — article card	"By Emanuel Espin 3 May 2024 — Venezuela's Dollarization: A Human Toll";	2024	"Latest news" carousel below the "OUR LATEST NEWS" H2; second-to-last position in the homepage rotation.	HIGH
Home (/)	News carousel — article card	"By Emanuel Espin 8 Aug 2024 — Unsatisfied Basic Needs in Venezuela";	2024	"Latest news" carousel below the "OUR LATEST NEWS" H2.	HIGH
Home (/)	News carousel — article card	"By Emanuel Espin 10 Mar 2024 — Abandoned Pets Struggle to Survive in Venezuela";	2024	"Latest news" carousel below the "OUR LATEST NEWS" H2.	HIGH
Home (/)	News carousel — article card	"By Emanuel Espin 26 Feb 2019 — ..."; (five-year-old article in rotation)	2019	"Latest news" carousel — appears when the user scrolls/clicks through to the right side of the rotation. Easy to miss on first view, present in the DOM.	HIGH
Home (/)	Body copy / stats	12 separate "2024" tags + 7 separate "2025" tags in visible body copy	2024 / 2025	Distributed across the impact-stats block ("30k+ People Helped"; etc.) and the article snippets in the news rotation.	HIGH
Endangered Animal Rescue (/project/endangered-animal-rescue-fund-venezuela-zoo)	Body — impact stats block	Year tags: 2020 (x3), 2021 (x2), 2022 (x5), 2023 (x6), 2024 (x3), 2025 (x5)	2020–2025	Stats block in the project body, below the "Long-Term Impact" section.	HIGH
Help Abandoned Pets (/project/pets-venezuela)	Body — impact stats block	Year tags: 2020 (x1), 2021 (x3), 2022 (x2), 2023 (x7), 2024 (x2), 2025 (x8)	2020–2025	Stats block in the project body.	HIGH
Help Venezuelan Orphans (/project/orphans-venezuela)	Body — impact stats block	Year tags: 2021 (x5), 2022 (x1), 2023 (x3), 2024 (x6), 2025 (x5)	2021–2025	Stats block in the project body.	HIGH
SAI Medical Clinic (/project/children-medical-clinic-venezuela)	Body — impact section	Year tags: 2021 (x4), 2022 (x3), 2023 (x7), 2024 (x5), 2025 (x6)	2021–2025	Stats block in the project body.	HIGH
News (/news)	Article listing	12 separate "2024" tags + 7 separate "2025" tags	2024 / 2025	Article cards in the main listing grid (same dataset as homepage news rotation).	HIGH
Help Venezuela (/project/help-venezuela)	Body — impact stats	Year tags: 2023 (x2), 2024 (x5), 2025 (x1)	2023–2025	Stats block in the project body.	MED
Help Venezuelan Hospitals (/project/help-venezuelan-hospitals-...)	Body — impact stats	Year tags: 2022 (x2), 2023 (x1), 2025 (x2)	2022–2025	Stats block in the project body.	MED
Help Venezuelan Refugees (/project/venezuelan-refugee-fund)	Body	Year tag: 2025 (x1)	2025	Inline body reference.	LOW

Page	Section	Finding	Year(s)	Location on page	Sev
Life-Saving Neurosurgery (/project/south-american-initiative-vns)	Body	Year tags: 2025 (x2)	2025	<i>Inline body references.</i>	LOW

Part C — Social media (with location)

Platform	URL on site	Status / verdict	Location on page	Notes
Twitter / X	https://twitter.com/	[HIGH] BROKEN	<i>Social-icons row in the global footer (and in the "Follow us on our social media" block above the footer).</i>	URL has no handle — clicks land on twitter.com homepage, not an SAI profile.
WhatsApp	https://wa.me/01963478543?text=Hello%2C+I+want+to+know+more+details.	[HIGH] FORMAT SUSPECT	<i>Global footer + "Get in touch" contact sidebar.</i>	wa.me expects an international number with no leading zero. The "0" in 01963478543 fails to open a chat on most clients. Likely should be 5841963478543 or similar.
YouTube	https://youtube.com/	[HIGH] BROKEN	<i>Social-icons row in the global footer.</i>	URL has no channel — clicks land on youtube.com homepage, not an SAI channel.
Facebook	https://www.facebook.com/southamericaninitiative/	[MED] WORKING / STALE	<i>Social-icons row in the global footer.</i>	Resolves to real SAI page (Plantation FL, donate@sai.ngo in bio). Last visible post "January 14"; pinned fundraiser is marked "Ended" (\$50/\$10,000). Engagement low (1.2K followers).
Instagram	https://www.instagram.com/sa_initiative	[MED] NEEDS MANUAL VERIFY	<i>Social-icons row in the global footer.</i>	Handle "sa_initiative"; matches the bio handle on the Facebook page — plausible match. Instagram blocks fetch automation; confirm owner + last-post date manually.

Location detail captured via Chrome MCP DOM inspection on 2026-06-06 — heading anchors and section class names are taken from the live markup; document Y positions are pixel-accurate at a 1001px viewport. Pending review. Assignment to follow.
